

# GESTIONE DEL PAZIENTE CON INDICAZIONE CHIRURGICA

Luca Ampollini, MD, PhD

*Chirurgia Toracica*

Azienda Ospedaliero-Universitaria di Parma

*Direttore prof. Michele Rusca*

# Visita Ambulatoriale

## *1° visita*

- Visita conoscitiva
  - Empatia
- Valutazione documentazione
  - Clinica
  - Radiologica
  - Funzionale

# Visita Ambulatoriale (2)

## *1° visita*

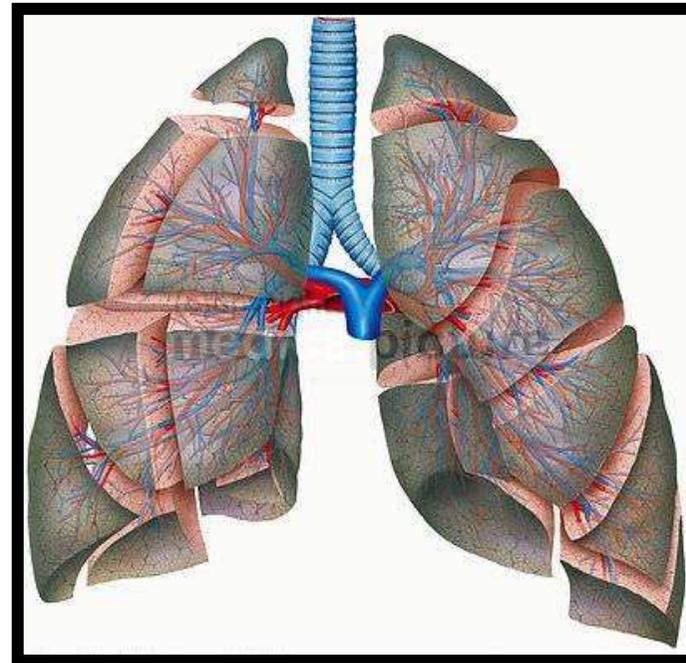

- Proposta di intervento chirurgico
  - **Approccio chirurgico (VATS, ...)**
  - **Rischi/benefici correlati a intervento**
  - **Riabilitazione postoperatoria (fisioterapia)**

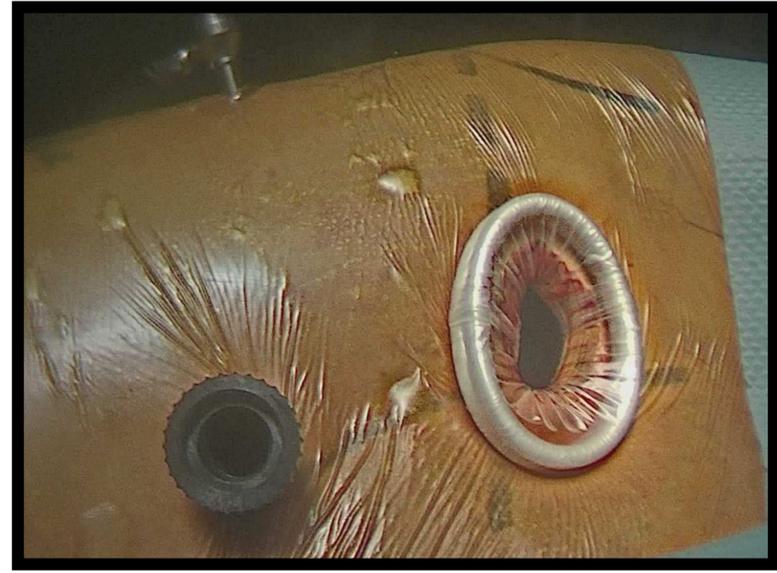

# Carcinoma Polmonare

## *Stadio Precoce (I-II)*

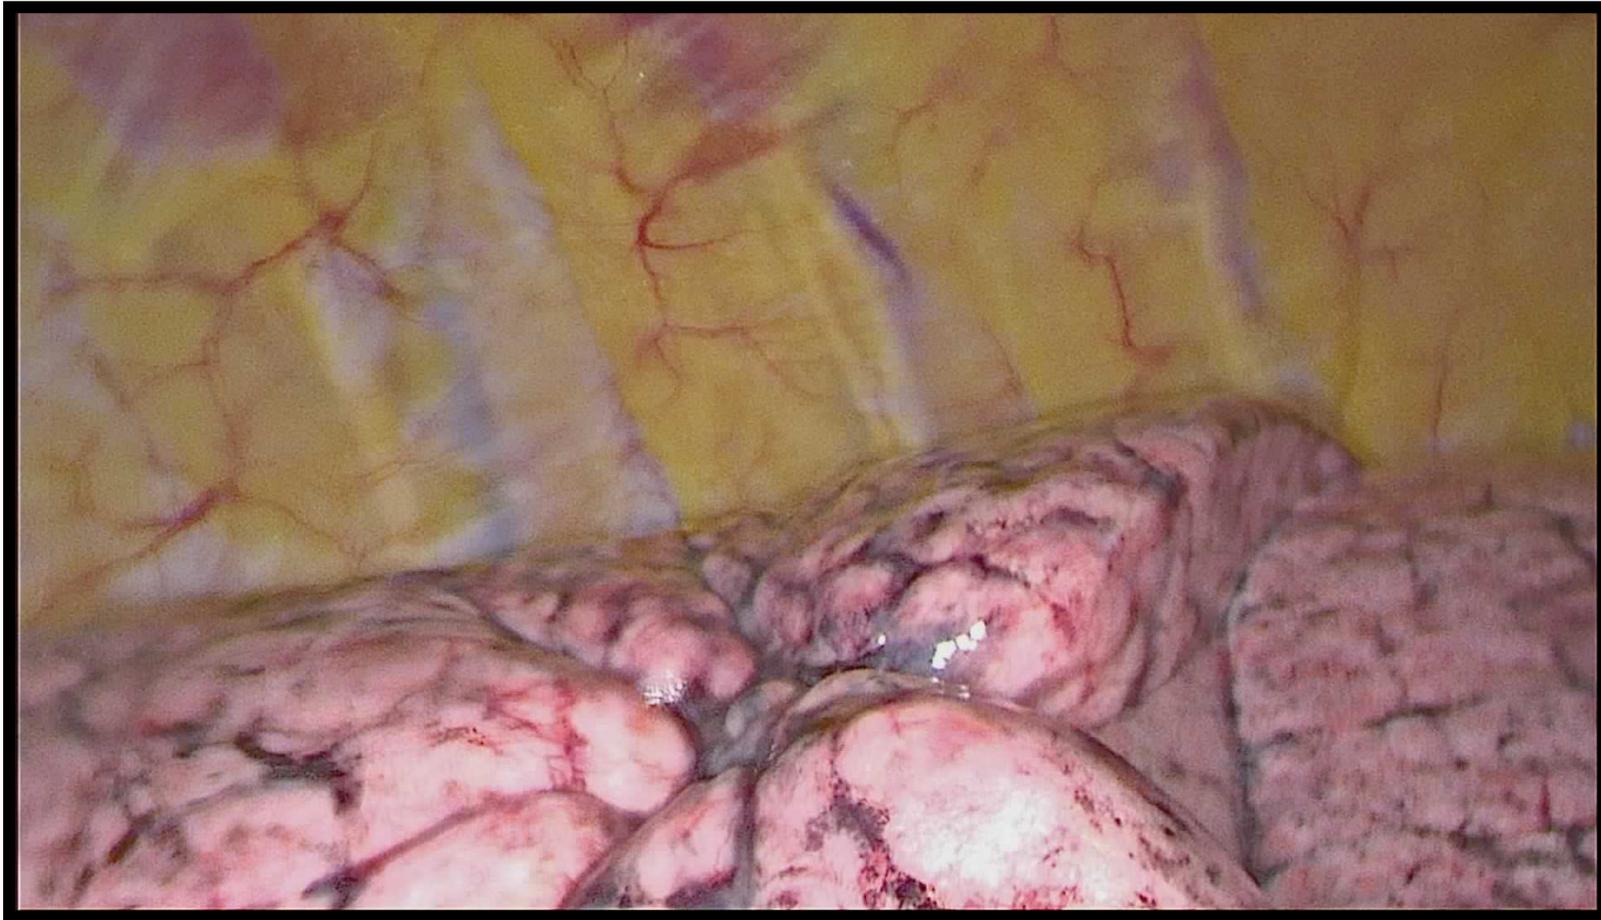

- Interventi chirurgici mini-invasivi (VATS)
  - Lobectomia
  - Segmentectomia
  - Resezione atipica

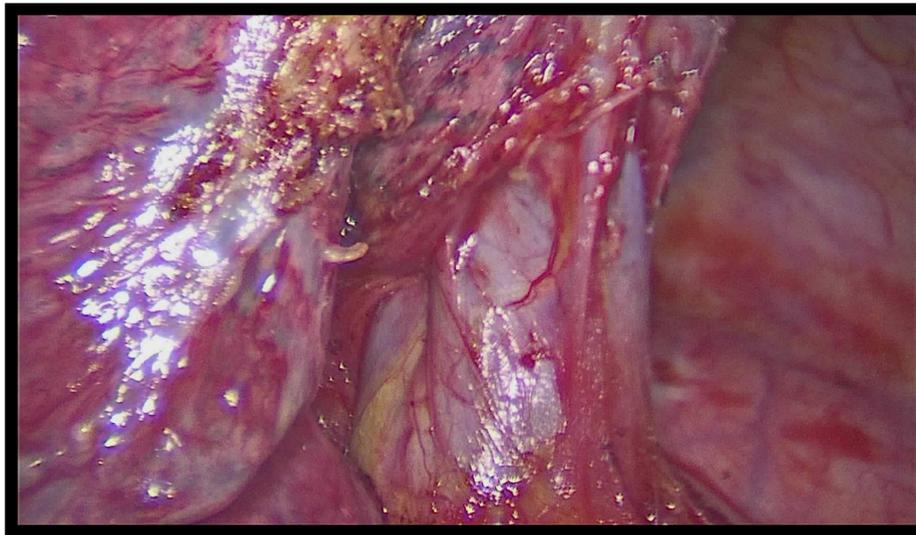

# VATS lobectomy

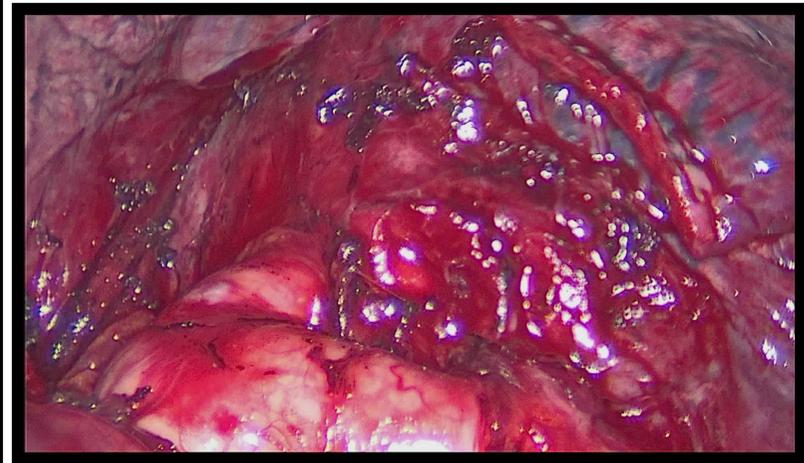

# VATS lobectomy (2)

# VATS lobectomy (3)

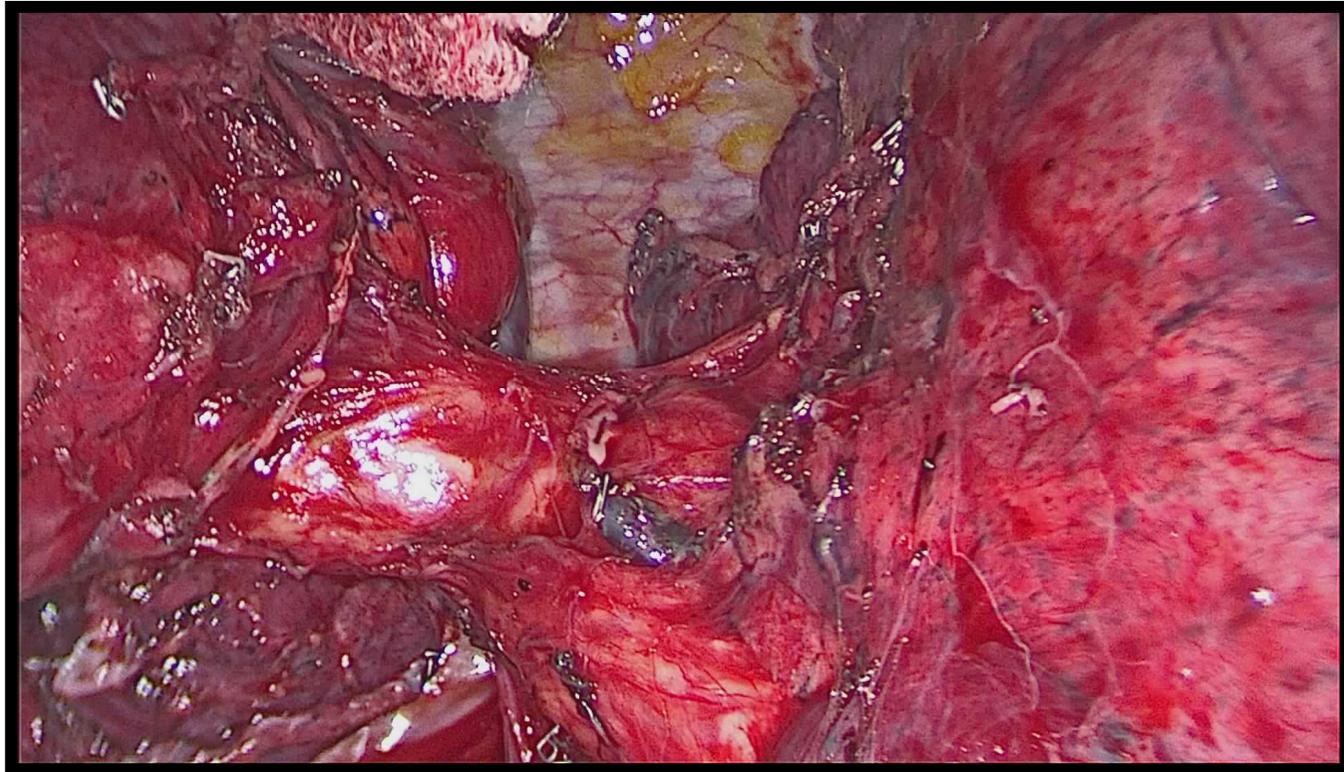

**Vena polmonare inferiore**

**Arteria polmonare**

# VATS lobectomy (4)

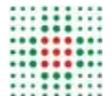

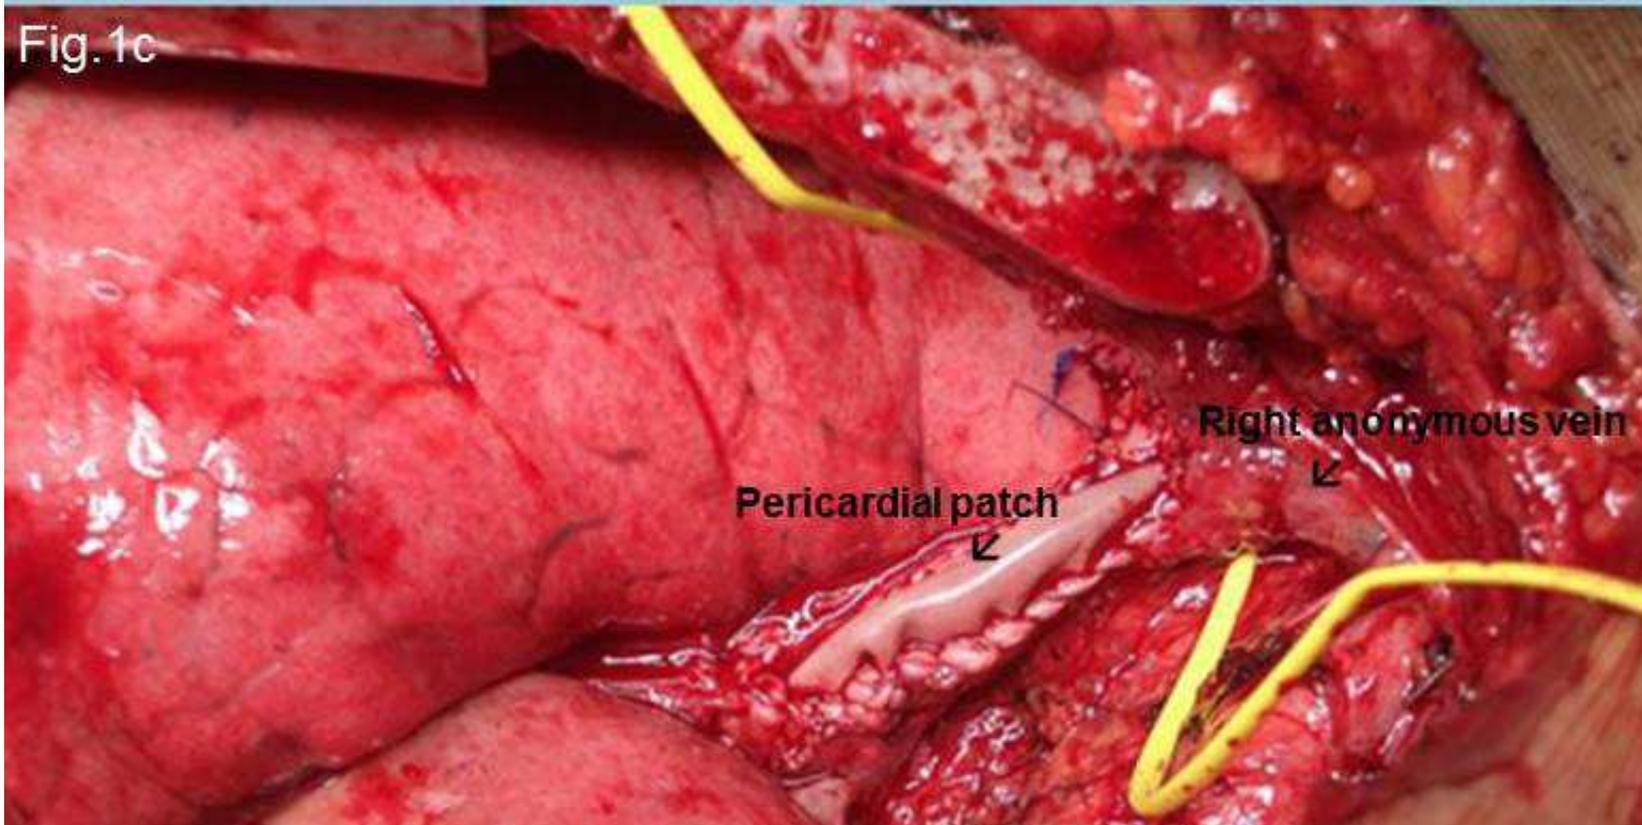

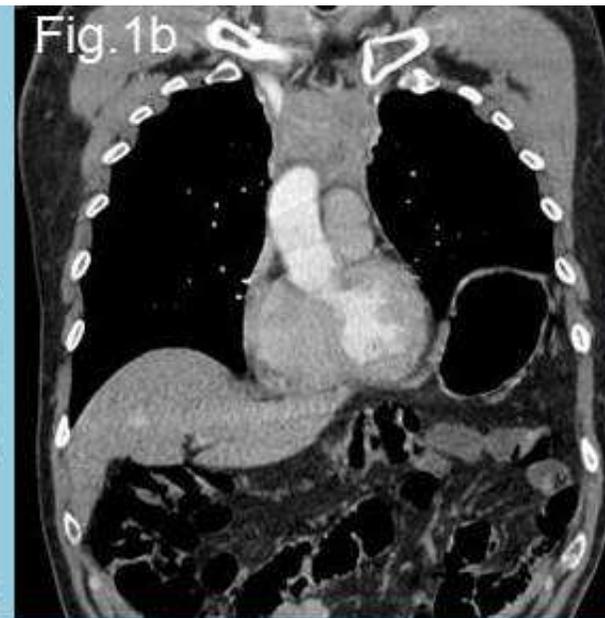

**Bronco lobare inferiore**

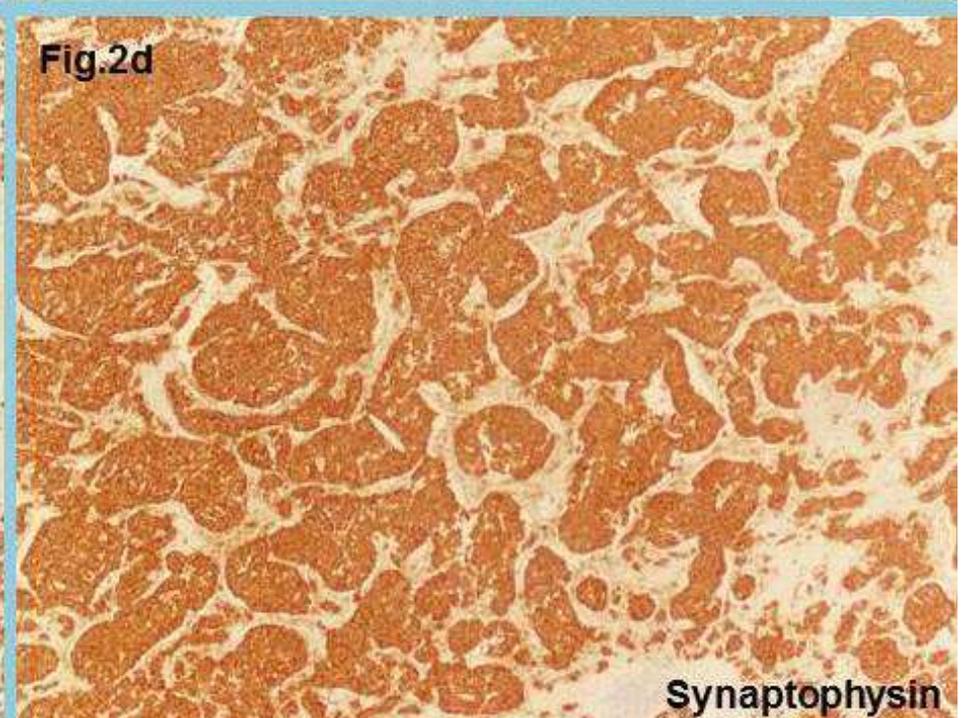

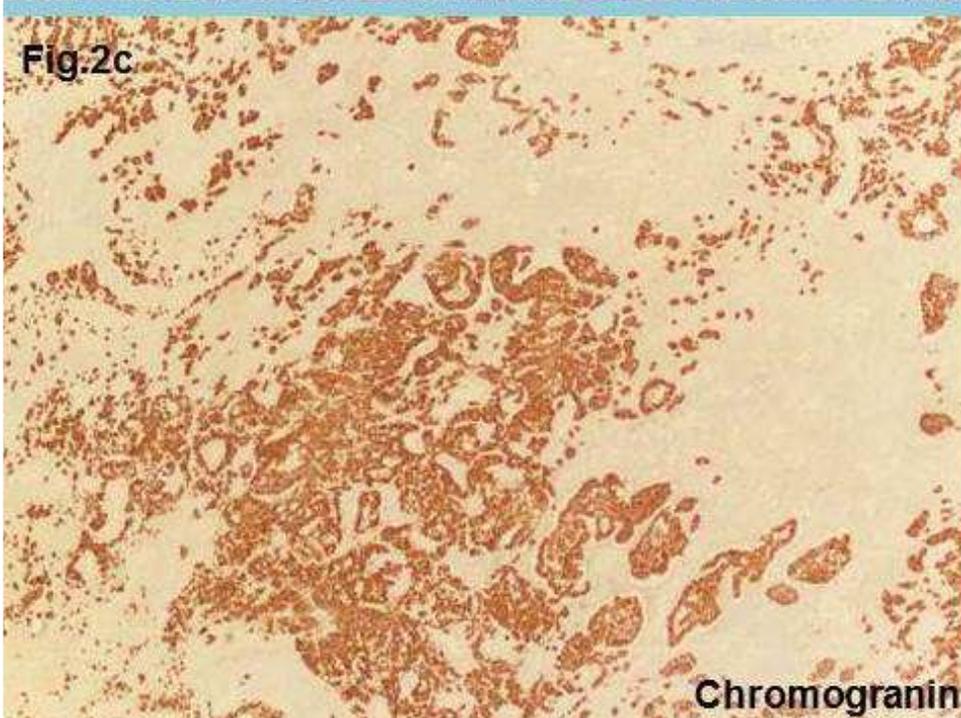

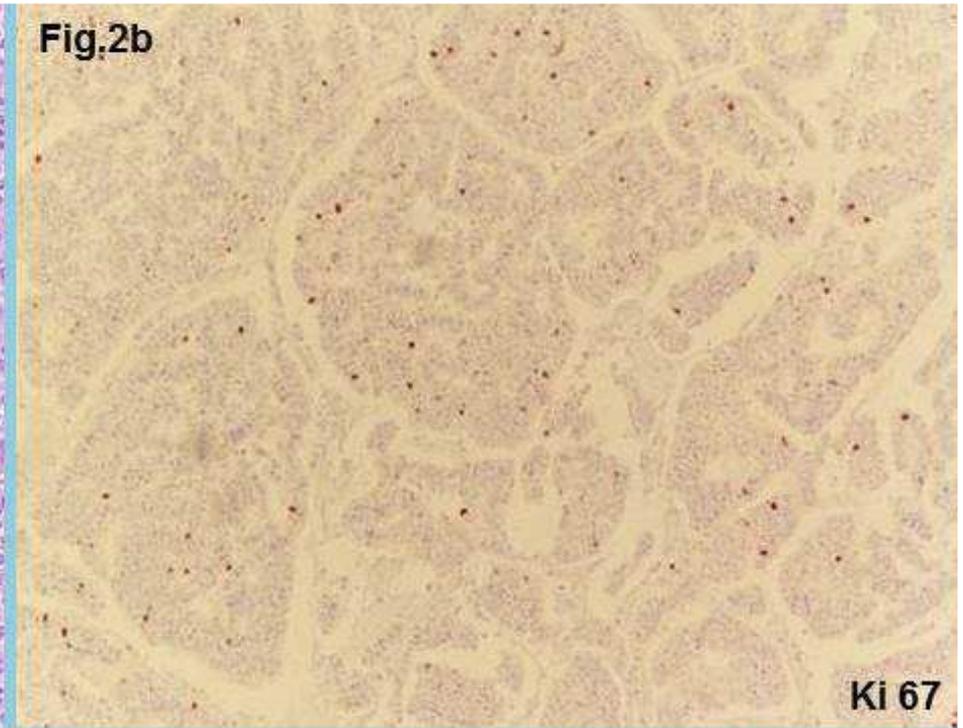

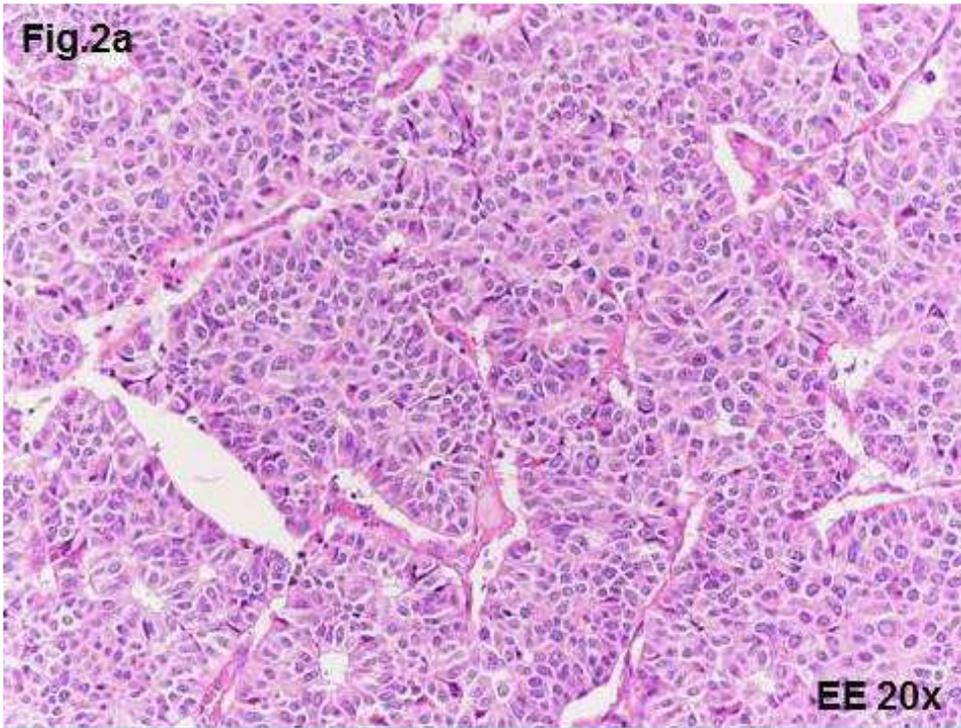

# Carcinoma Polmonare *Stadio localmente avanzato (IIIA)*

## Neoplasie Mediastino

- Interventi chirurgici allargati
  - Resezione/ricostruzione parete toracica
  - *Sleeve lobectomy/pneumonectomy* (bronco e arteria)
  - Resezione/ricostruzione vena cava superiore e atrio

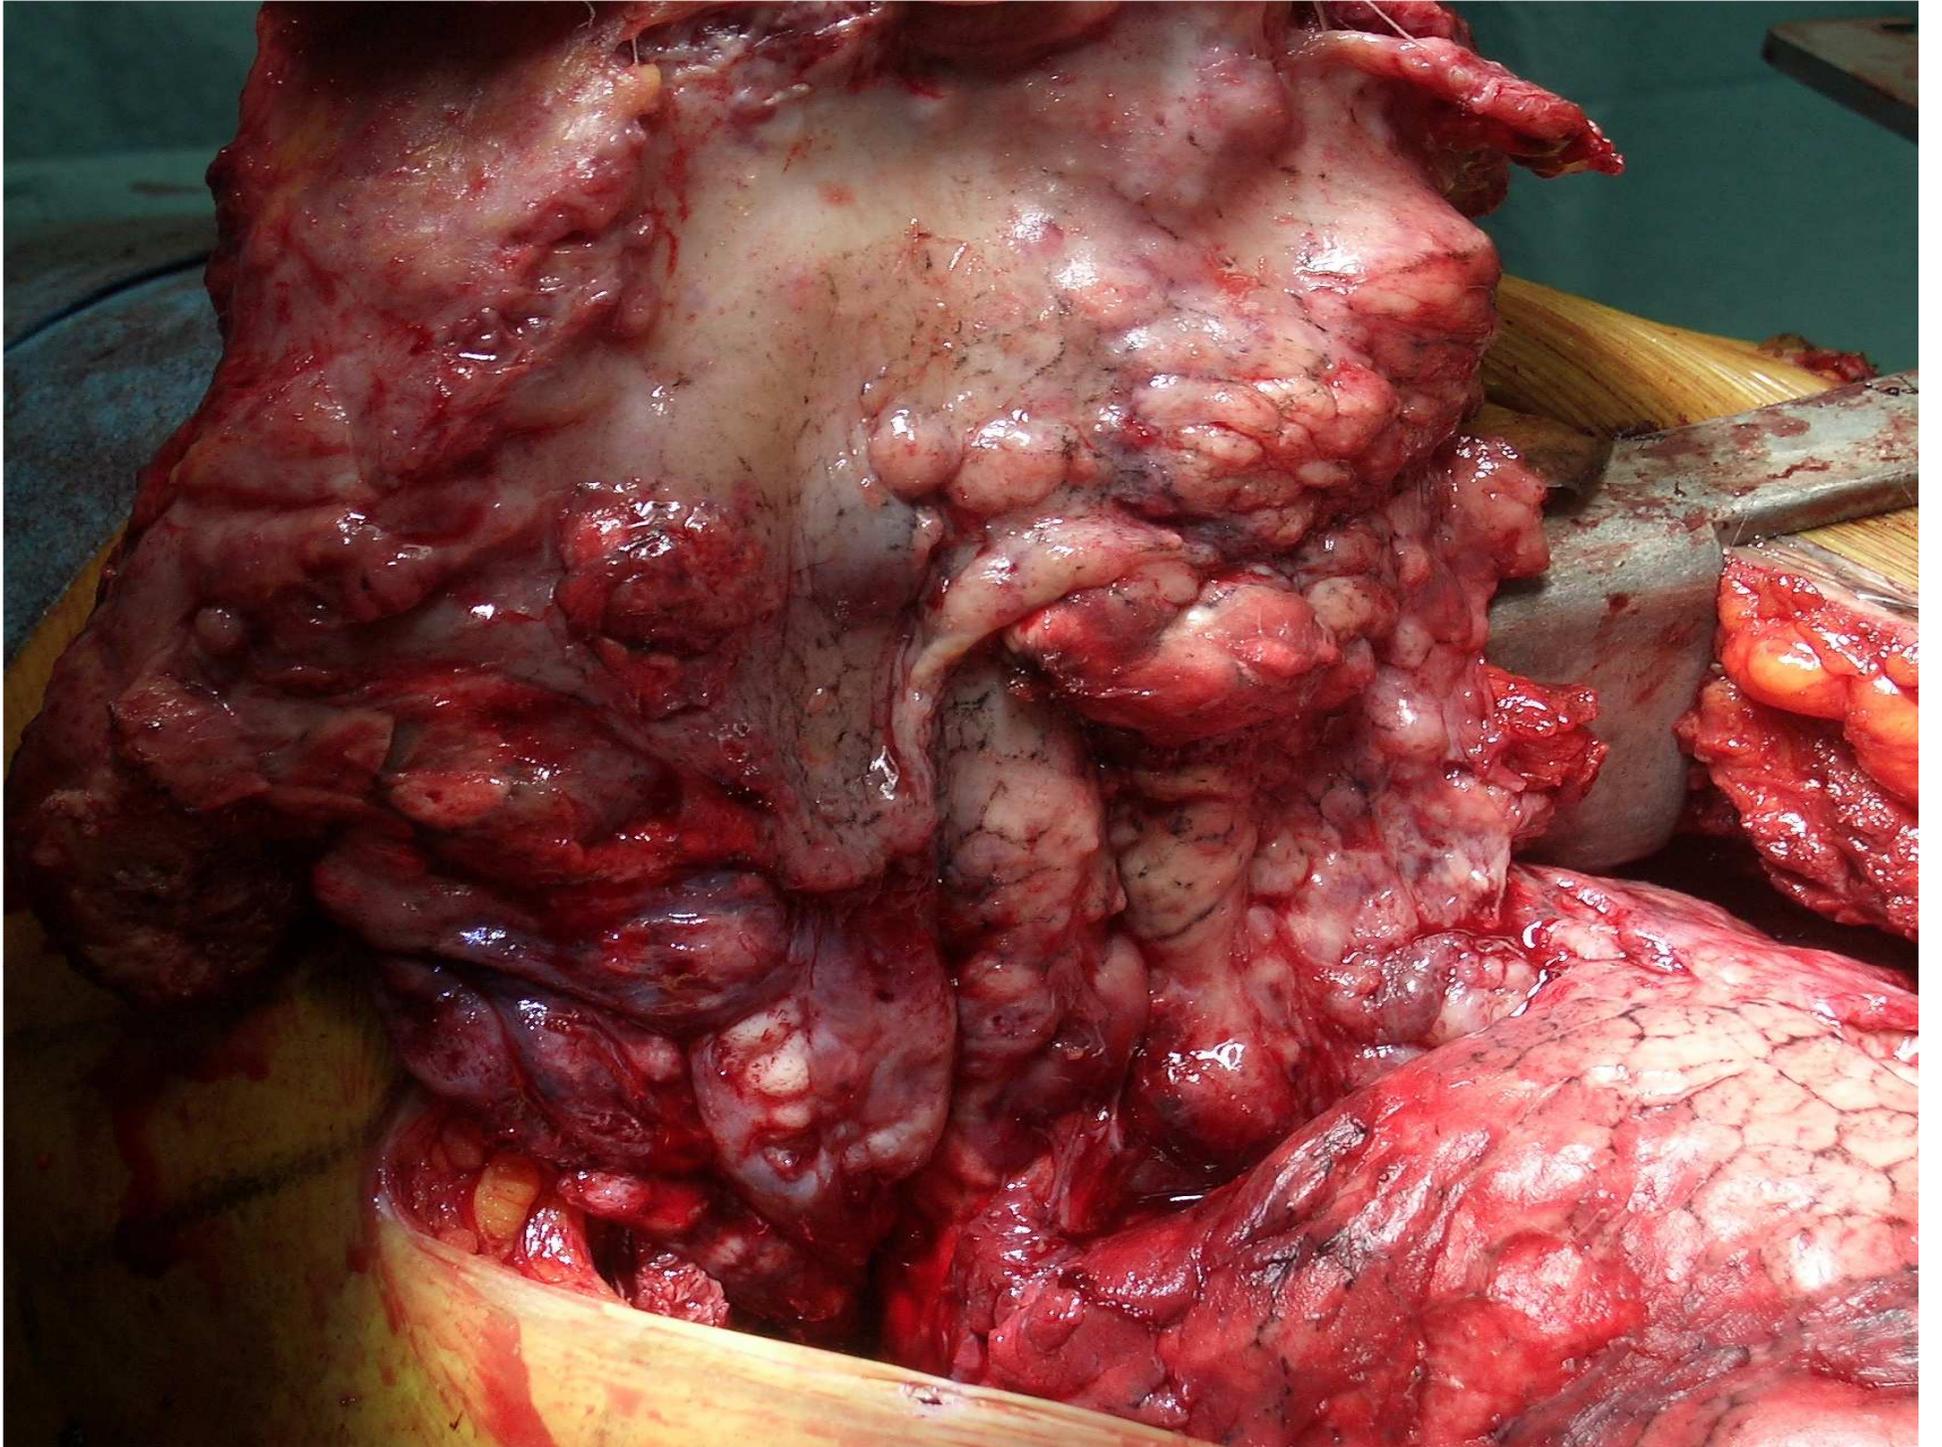

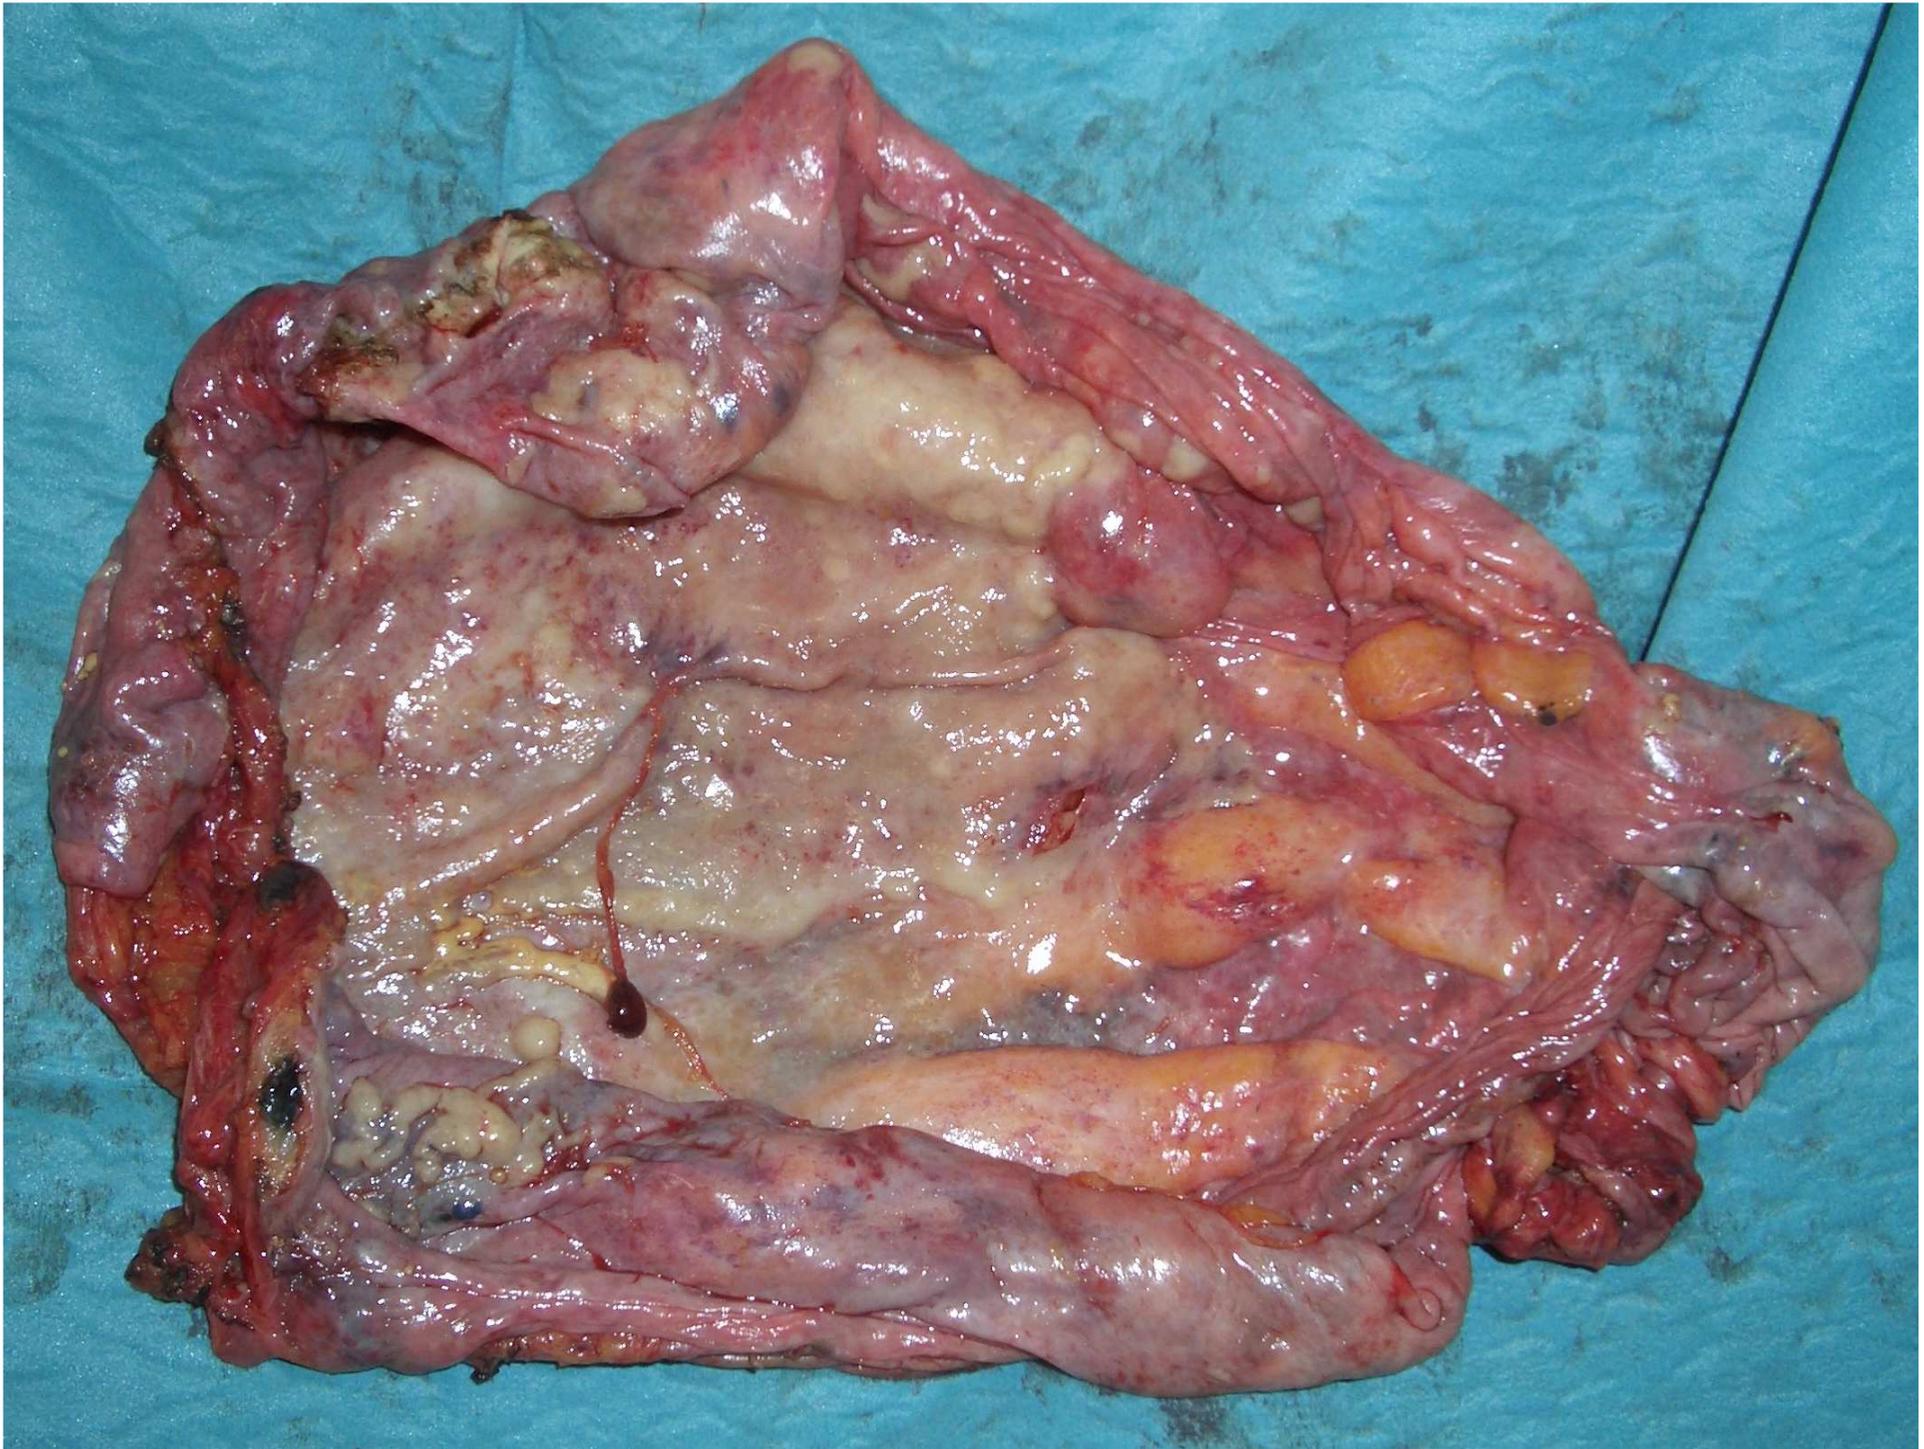

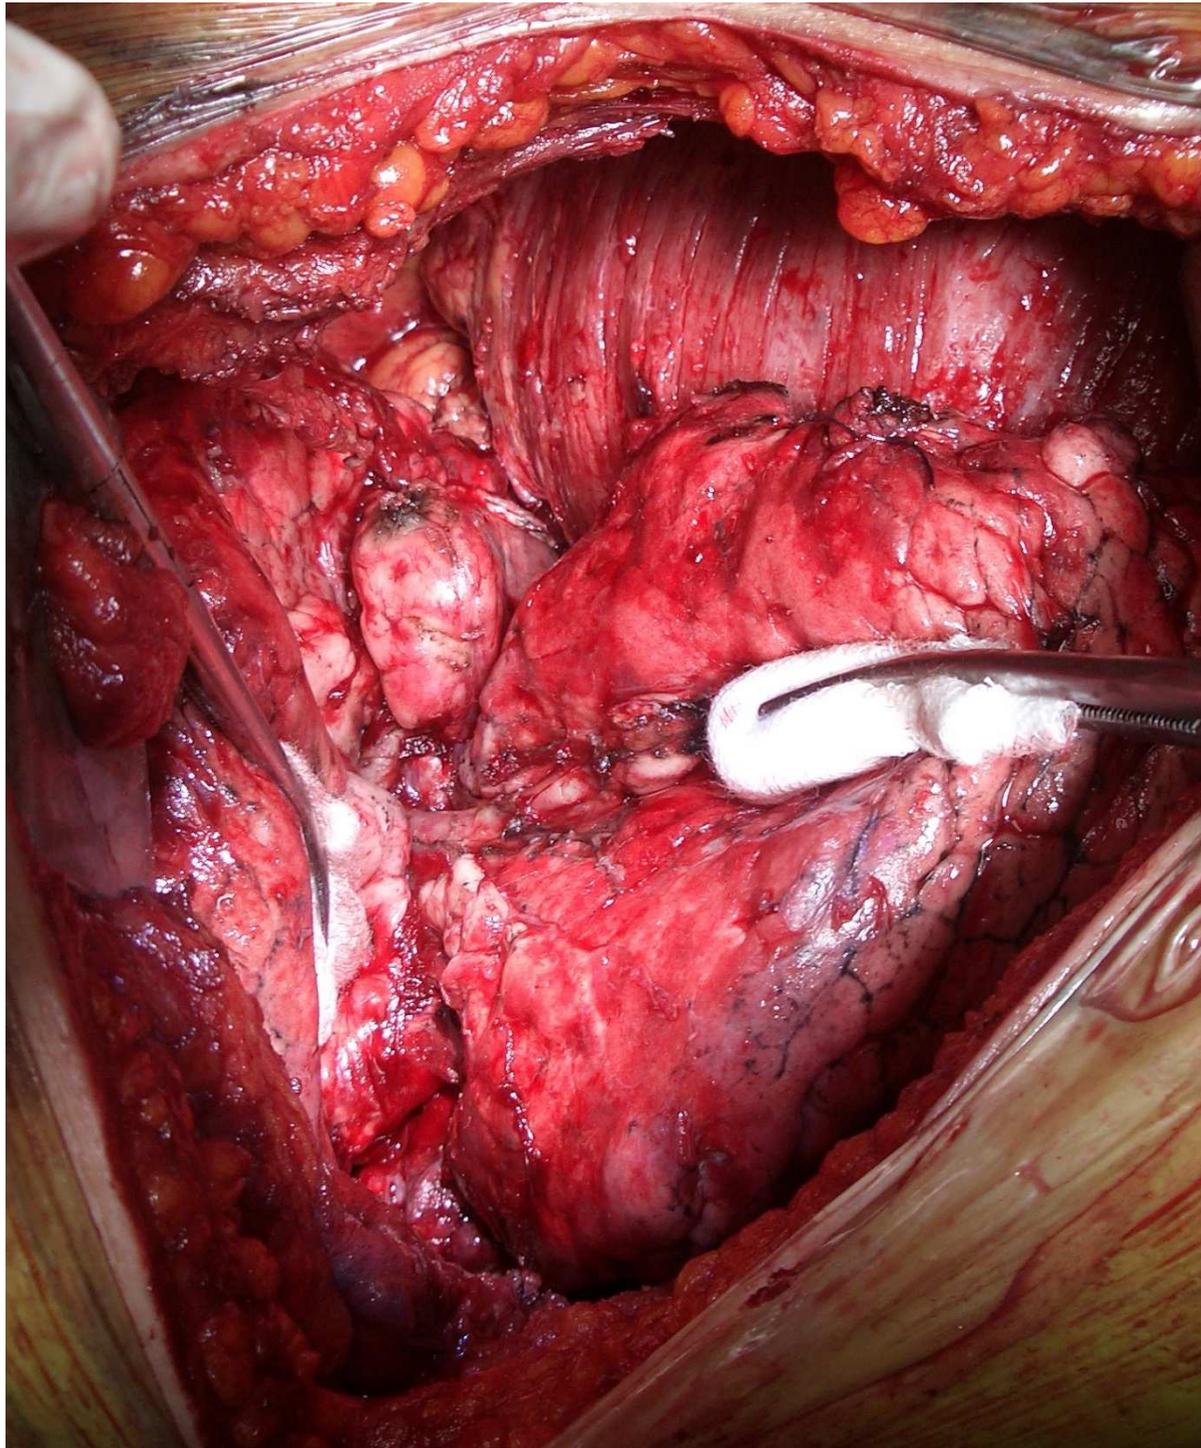

# Mesotelioma Pleurico Maligno

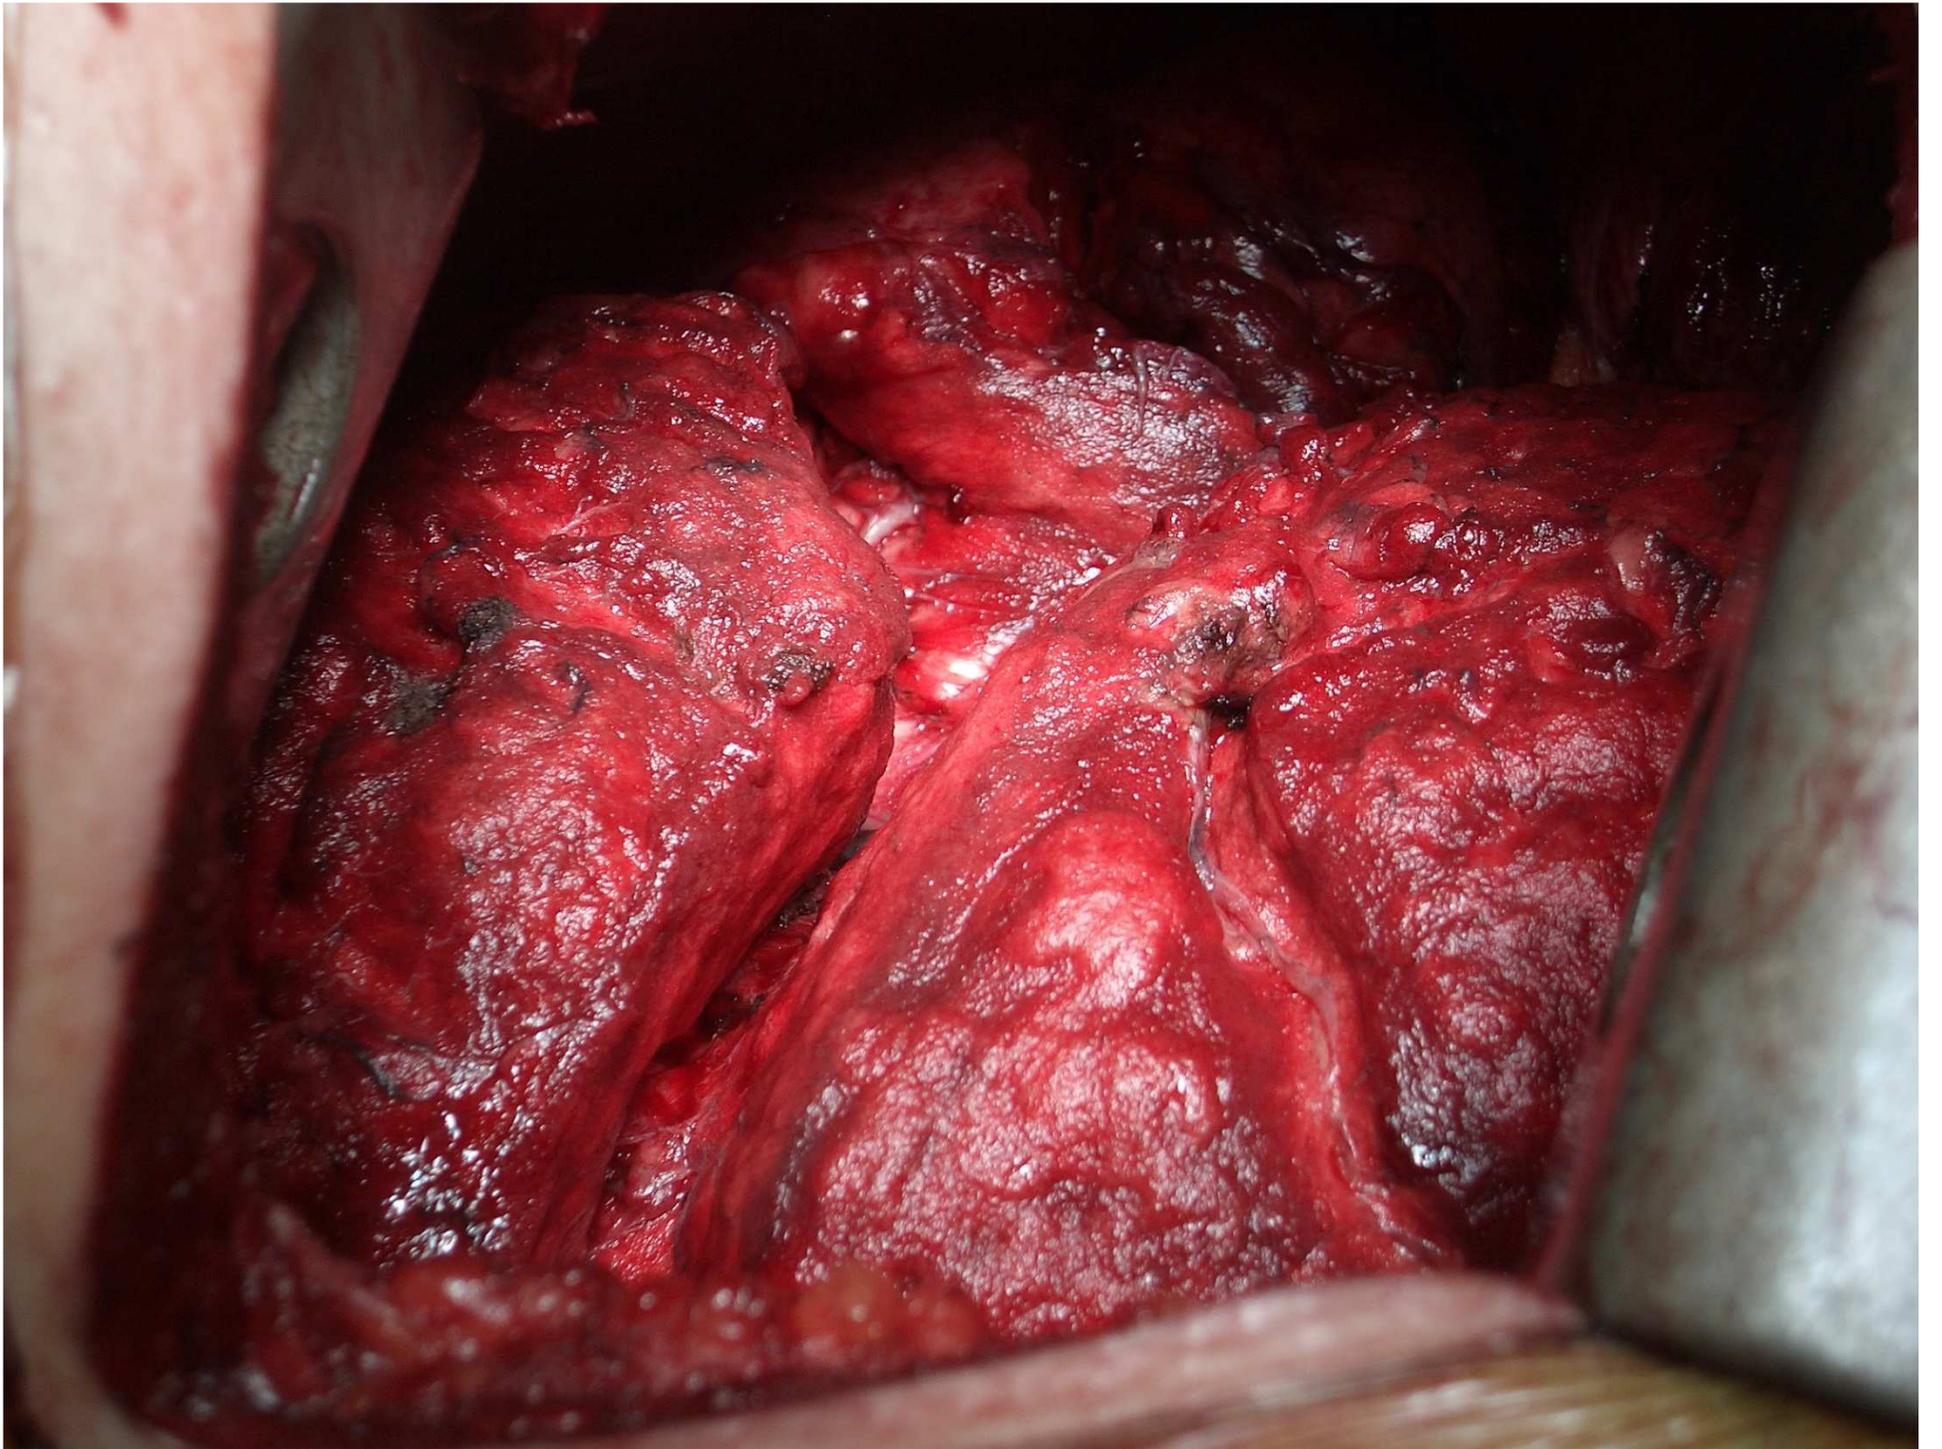

- Pleurectomia/decorticazione radicale (*asportazione diaframma e pericardio*)
- Pleuro-pneumonectomia extrapleurica

# Fase Postoperatoria

- *Fast Track Surgery o Enhanced Recovery After Surgery (ERAS)*
- Fisioterapia Respiratoria
- Mobilizzazione precoce
  
- Riduzione complicanze
- Riduzione della degenza
